HIV Outcomes is a multi-stakeholder initiative that seeks to improve the long-term health outcomes and quality of life of all people living with HIV across Europe. The initiative brings together academics, patient representatives, clinicians and industry and aims to share evidence-based best practices and innovative approaches to care, while implementing policy and clinical changes in European countries.

HIV Outcomes supported a special series of the highly regarded peer-reviewed medical journal, The Lancet HIV. '*The Lancet HIV Series on HIV Outcomes: Beyond Viral Suppression*' was led by HIV Outcomes Co-Chairs Prof. Jeffrey V Lazarus and Prof. Jane Anderson and puts the spotlight on person-centred HIV care, tackling stigma and reorienting services for a new era that goes 'beyond viral suppression'.
